- Medical freedom is a **fundamental human right** we have to fight for. **Mandatory vaccine laws** are being pushed by the vaccine industry in multiple states. Help us fight this!
- Vaccines contain **toxic ingredients** including **aluminum**, a known **neurotoxin**. It does health damage, even in tiny amounts, especially when injected.
- Formaldehyde, an industrial **pesticide** and known to cause **cancer** in humans, is also used in vaccines. Cancer is now a **leading cause of death** in U.S. children.
- Vaccines have **never been studied for safety long term** or against a real placebo. They have never been tested for **safety** in combination, yet 6-9 doses are given to children each doctor visit.
- The U.S. gives **more vaccines** than any other developed country, 36 vaccines to babies by age 1.
- The U.S. also has the highest rates of **chronic health issues**, including: type-1 diabetes, asthma & allergies, seizures disorders, multiple sclerosis, infertility, autism, autoimmune issues, cancer & sudden death. All of these have been linked to vaccines or their ingredients by scientific studies.
- Vaccine makers are protected from **lawsuits** regarding vaccine side effects and death. But U.S. taxpayers have paid out \$4 BILLION to those **severely injured** by vaccines. Help us change this!
