

# CAMPAIGN TO EDUCATE THE GENERAL PUBLIC OF THE DANGERS OF BEING VACCINATED

I invite everyone to join me in educating people about the dangers of vaccines. At the end of the day, our biggest foe is the general public that has not only been kept uninformed of the dangers of vaccines, but is also unaware of Big Pharma's (AKA: our supposed government's) plans to pass laws to make it impossible for anyone to avoid government mandated vaccines.

We need to do a campaign to inform our family and friends about such dangers, and what better way than via Facebook. Here is what I suggest considering and doing.

Most people that have been indoctrinated in believing that vaccines are good for them, are also convinced, by the same propaganda machine, that unvaccinated persons/children can threaten their health because they are the likely carriers (of course, we know this is the dumbest reasoning, as if true, it proves that vaccines don't work!).

The above claim can be easily disproven by showing, through published reports and newspaper articles that in fact vaccinated persons "are primarily, if not the only ones," involved in virus disease outbreaks. Here is my proof:

<b>Exhibit 1</b> San Diego, CA 8/5/2010	Whooping Cough	<b>Total Cases</b> 4 Fully Vaccinated 2 Vaccinated, missed booster 2 <b>Unvaccinated</b> 0
<b>Exhibit 2</b> San Diego, CA 8/26/2010	Whooping Cough	<b>Total Cases</b> 3 Vaccinated 2 Vaccinated, missed booster 1 <b>Unvaccinated</b> 0
<b>Exhibit 3</b> San Diego, CA 10/7/2010	Chickenpox	<b>Total Cases</b> 10 Fully Vaccinated 8 Vaccinated, missed booster 1 Unidentified 1 <b>Unvaccinated</b> 0
<b>Exhibit 11</b> Lexington, KY 2/22/2016	Mumps	<b>Total Cases</b> 3 Fully Vaccinated 3 <b>Unvaccinated</b> 0
<b>Exhibit 12</b> Montgomery County, PA 4/11/2016	Whooping Cough	<b>Total Cases</b> 56 Fully Vaccinated 56 <b>Unvaccinated</b> 0
<b>Exhibit 13</b> Chicago, IL 2/23/2016	Whooping Cough	<b>Total Cases</b> 5 Fully Vaccinated 5 <b>Unvaccinated</b> 0

See articles at: [http://www.cafepeyote.com/files/Vaccinated\\_Children\\_Outbreaks\\_Flyer.pdf](http://www.cafepeyote.com/files/Vaccinated_Children_Outbreaks_Flyer.pdf)

So the strategy is to show/explain to our friends, based on the evidence above, that:

1. If vaccines work, they don't have to worry about unvaccinated persons;
2. If unvaccinated persons are not even involved in outbreaks, or if anything only a smaller percentage, then unvaccinated persons can't contaminate anyone in any manner worse than those vaccinated; and
3. **Because vaccinated persons are the only ones that seem to be getting infected AND ARE INFECTING OTHERS, this clearly means that VACCINES MAKE PEOPLE MORE SUSCEPTIBLE TO CONTAGIOUS DISEASE.**

If we can break this mental barrier, it would instantaneously bring others to the flock, maybe not necessarily to protect OUR freedoms, but as a way for them to protect themselves.

### **SECOND CALL TO ACTION**

The articles above are some of the one's I have compiled. If you have any old ones or come across new ones please email them to me at [Ricardo@CafePeyote.com](mailto:Ricardo@CafePeyote.com), subject title "Vaxx Article" or something to that effect and I will attach them to the images above to expand on the evidence (the clearer the better). So here is the suggested post to your and your friends' Facebook timeline (feel free to modify):

-----

#### **VACCINATED INDIVIDUALS PROVEN TO CAUSE OUTBREAKS IN COMMUNITIES**

A review of media reports show that in cases of public contagious disease outbreaks, like Whooping Cough and Chickenpox, it is people that have been vaccinated that are the ones not only getting infected, but being carriers and passing it to other vaccinated persons around them. See: [http://www.cafepeyote.com/files/Vaccinated\\_Children\\_Outbreaks\\_Flyer.pdf](http://www.cafepeyote.com/files/Vaccinated_Children_Outbreaks_Flyer.pdf)

#### **WHAT DOES THIS MEAN TO THE VACCINATED PUBLIC?**

1. If unvaccinated persons are not even involved in outbreaks, or if anything only a smaller percentage of them are, then unvaccinated persons can't contaminate anyone or have a smaller chance of being carriers and thus pose no threat to the general public, and
2. **Because vaccinated persons are the only ones that seem to be getting infected AND INFECTING OTHERS, this clearly means that VACCINES MAKE PEOPLE MORE SUSCEPTIBLE TO CONTAGIOUS DISEASE.**

Get informed, see the medical documentary "Vaxxed: From Cover-Up to Catastrophe" (<https://www.youtube.com/watch?v=EdCU2DfMBpU>) and join the movement to stop mandatory forced vaccines. IT IS NO LONGER CHILDREN ONLY – THE PATH HAS BEEN SET FOR EVERYONE TO BE VACCINATED, WHETHER THEY LIKE IT OR NOT – JUST ASK VETERANS, HEALTHCARE WORKERS AND DAYCARE WORKERS!

-----

Sometimes it is a matter of simply calling attention to something that starts the conversation going. With this in mind I also had a T-Shirt made to do just that; it takes them to my site, where I have compiled the most pertinent info to help our cause, newcomers and warriors like us alike. I invite you to do something similar and feel free to share my site [www.CafePeyote.com/Vaccines](http://www.CafePeyote.com/Vaccines).

Best wishes,

Ricardo Beas
