

## NOTICE OF NO USAGE OF FACIAL COVERINGS/MASKS

DATE: \_\_\_\_\_  
SCHOOL: \_\_\_\_\_  
ATTN: NAMES PRINCIPAL AND DISTRICT SUPERINTENDENT  
RE: MY CHILD STUDENT NAME  
USE OF FACIAL COVERINGS/MASKS

Dear Principal and District Superintendent,

Please be advised that my son/daughter FULL NAME will not be wearing any facial coverings, masks, faceshields, or any other similar devices, hereinafter masks, for any reason at your school, any district property, or any sports events or gathering sponsored by the school. I base this on the following:

1. My child does not have COVID-19 and he/she does not have any symptoms associated with such a flu-like diseases, and as noted by Dr. Fauci and the World Health Organization, asymptomatic carriers do not spread the disease.<sup>1</sup> My child will practice reasonable distancing from other students, staff, and visitors, and will follow common sense and logical sanitary practices. I am always mindful of my child's health and If my child were to show any minimal symptoms typical of these diseases, I will ensure that he/her does not attend school until all symptoms have passed.

2. (ONLY IF APPLICABLE) My child has a medical condition that precludes him/her from wearing a mask, as it affects his/her health. County health departments, such as the one in San Diego County, California, make it clear that persons with certain medical conditions should be exempt from wearing masks.<sup>2</sup> Your organization's policies must conform to the guidance/order and allow my child to be exempt from wearing a mask.

3. Recent evidence has shown that the impact of wearing a mask on learning and psychosocial development on school children is negative and is not in the overall interest of the child, as it impairs their ability to breathe, slowing their social and emotional development, and causes them anxiety. One need only see the news for such new findings.

4. The use of a mask is contrary to our religious practices and rights. God gave us oxygen to breath in order to live. The use of facial coverings reduced the oxygen level being inhaled and forces the wearer to re-inhale carbon dioxide so that it creates a dangerous hazardous atmosphere for the person using the mask, which might result in headaches, increased airway resistance, suffocation, hypoxia, incapacitation, injury, acute illness and the risk of death,<sup>3</sup> and thus defiles my child's body, which is the Temple of God, which God prohibits us to do.<sup>4</sup>

5. **PROBABLY MOST IMPORTANT: NO FACIAL COVERINGS STOPS SOMEONE FROM BEING INFECTED WITH ANY VIRUS, OR TO GIVE IT TO ANYONE ELSE.** Studies done prior to COVID-19,<sup>5</sup> as well as recently,<sup>6</sup> prove that no facial covering will stop a virus from infecting a person or stopping transmission.

6. **NOTICE OF LIABILITY.** While I would like to continue having my child attend this school, **refusal to allow my child to attend school without wearing a facial covering or coercing him/her to wear a mask will be considered a violation of our legal rights, a violation that may result in action against your school, the district, and you in your personal capacity, as you would be acting outside the scope of your employment and therefore violating your oath of office to protect our constitutional rights, leaving you without any governmental immunity.**

Other violations include those under US CODE Title 18, Section §242, Deprivation of rights under color of law. See also 42 USC 2000a. **Your school has no legal responsibility or liability, nor will it get a fine for allowing my child to be in school and related events without a mask when I have expressed our legal right and intent not to do so.** I take full responsibility for my child not wearing a mask and hold you harmless for allowing my child to do so.

RESPECTFULLY SUBMITTED,

Your Name,
